

# PDF Stamper

Embed data directly from Quickbase to your pre-made, previously formatted static PDF documents.

PDF Stamper allows you to embed data from your Quickbase tables directly into your pre-formatted PDF documents. Additionally, process multiple records at once, customize font styles, display sub-reports and even “stamp” images and barcodes into your PDFs.

## Key Benefits:

### Add Quickbase Data to Static PDFs

Effortlessly “stamp” Quickbase data into fixed PDF files at predetermined positions.

### Preserve Document Formatting

Retain the original PDF formatting while “stamping” new information, eliminating the need to convert to MS Word and back.

### Easily Generate Multiple PDFs

Efficiently generate multiple PDF files for all records in a Quickbase report.

## Product Features:

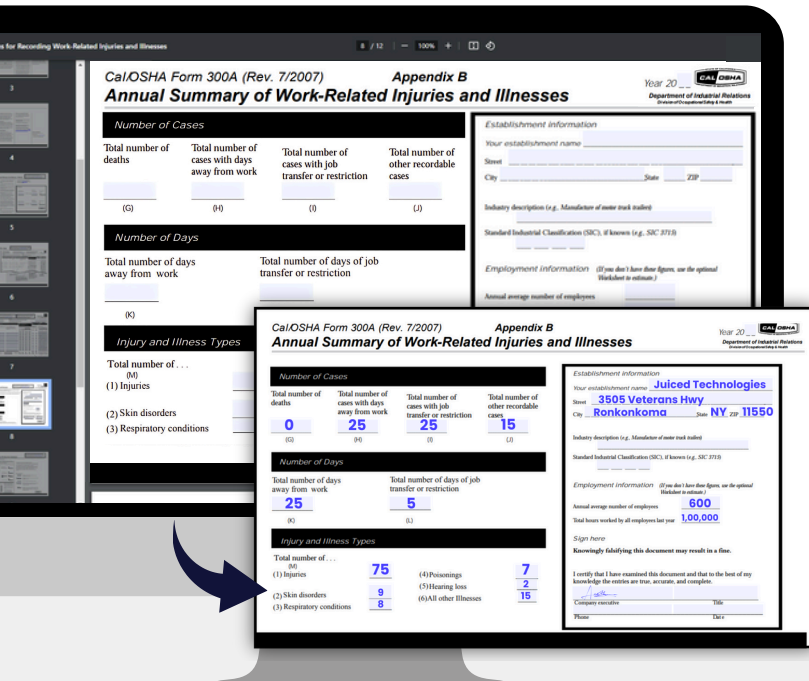

- Embed sub-reports and data grids into your PDF template.
- “Stamp” images from Quickbase file attachment fields into PDFs.
- Choose font size, color and formatting.
- “Stamp” QR codes and barcodes into your PDFs.
- Add watermarks to certificates and PDFs.

## Commonly Paired Add-Ons:

- **JuicedSign:** Use your “stamped” PDF Documents for electronic signature.
- **Courier:** Email your “stamped” PDF as an attachment directly from Quickbase.
- **Package Builder:** Automatically consolidate various file types into one cohesive PDF.

## Commonly Generated Documents:

- ✓ Certificates
- ✓ Fillable Invoices
- ✓ Government Documents (W-9, W-4, I-9, AIA forms)
- ✓ Brochure
